

Become the Best Therapist for Your Child's Development

The Family Hope Center utilizes a scientific approach to teach, guide and support professionals and parents of children with special needs how to proactively improve their child's development.

Together we:

- Teach you about the brain and how it works
- Assess the root cause of your child's developmental challenges
- Design an science based program to develop your child's brain

I enjoyed the whole experience, and now I know there are plenty of ways I can help my child that nobody ever told me about.

Orla B., Armagh, Ireland
Parent Training Conference Graduate

**"Thank You to all the Team!
I can go home knowing that I understand my child!
Most important knowing I can heal my son."**

Nikita C., Liverpool, UK
Parent Training Conference Graduate
